EXPERIENCE

SAN ANDREA'S ROLEPLAY – GTA:SA

www.gta-sarp.com

I worked as part of a small development team for three years. This involved using community suggestions for new features, which were then programmed, tested and pushed to the multiplayer server. PAWN, MySQL and GitHub were used frequently.

MICHAEL MCMULLAN ORTHOPAEDIC SURGEON

www.belfastlimbrecon.com

I worked with Michael and his secretary to provide a professional and functional website. The website was built using WordPress alongside other extensions to meet his needs. An example of this was an appointment booking system for his clients, which synced with his calendar application.

NORTH BELFAST'S MEN'S SHED

www.ashtoncentre.com

I worked with Geraldine Nelson to outline requirements for the new Men's Shed website. This included discussing a content management system and an e-commerce shop. The new website is still in development and once it has been finalized I will be maintaining it for 12 months.

WORK / VOLUNTEERING EXPERIENCE
