EDUCATION

Queen's University Belfast

Bachelor of Engineering in Software Engineering

Belfast, UK

Sep. 2017 – July 2021

Belfast Metropolitan College

Extended Diploma in IT

Belfast, UK

Sep. 2015 – Sep. 2017

EXPERIENCE

Fullstack Software Engineer

IC Markets

Feb. 2023 – Present

Sydney, AU

- Integrated deposit/withdrawal using REST APIs for 3 payment providers (crypto and credit card)
- Developed payment processing forms and questionnaires
- Maintained legacy codebase, debugging complex issues
- Writing unit tests with NUnit
- Collaborated with cloud team to dissect infrastructure and rebuild from the ground up for a new entity

Fullstack Software Engineer

NantHealth

July 2019 – Jan. 2023

Belfast, UK

Software Engineer

Sep. 2022 - Jan. 2023

Graduate Software Engineer

July 2021 - Sep. 2022

- Developed FHIR server-sided logging library with Event Hub integration, available in internal .NET SDK
- Created a .NET application responsible for saving Okta (IAM) logs in persistent storage
- Developed portal with Vite.js and Webpack 5 for microfrontend architecture, focusing on header, footer, menu
- Created reusable Azure Terraform modules (App Service, Function App, Event Hub, Key Vault, etc.)
- Built CI/CD templates on Azure DevOps (Infrastructure, Build, Test, Deploy) during transition to Azure
- Writing functional tests with Cucumber (TypeScript) and WireMock

Associate Software Engineer

June 2019 - June 2020

- Developed a .NET app responsible for sending scheduled emails, deployed to K8S as a cronjob
- Brought in the use of sealed-secrets to the K8S deployed applications
- Created a widget using Vue 2 for users to control their alerting preferences
- Writing unit tests with NUnit (.NET) and functional tests with Robot Framework (Python)

PROJECTS

GTA: San Andreas Roleplay | PAWN, MySQL

June 2014 – June 2017

- Developed a roleplay gamemode for GTA: San Andreas Multiplayer, with 500 concurrent players
- Converted player data store to use MySQL database instead of text files, normalizing data
- Built mini-game events, such as capture the flag
- Collaborated with server administrators and players to implement suggested features and get feedback about the gamemode

Modmenu for Call of Duty: MW2 | C++

June 2015 – Aug. 2015

- Developed a modmenu patch to enjoy with my friends
- Published patch and YouTube video showcasing gathered 2K views
- Collaborated with friends to suggest features and get feedback about the patch

TECHNICAL SKILLS

Languages: C#, SQL (MS SQL), TypeScript, JavaScript, HTML/CSS, HCL

Frameworks: .NET, Entity Framework, Terraform, NUnit, Vue.js, Node.js, Vite.js, jQuery, Cucumber, Selenium, Robot

Developer Tools: Git, JIRA, Visual Studio, Postman, VS Code, Azure, AWS, VS Code, Swagger, WireMock, Bamboo, Octopus, CodePipeline, K8S, Volta

Libraries: Autofac, Newtonsoft.Json, Swashbuckle, Serilog, AutoMapper, Webpack 5, Feather DS
